Linear Algebra – A
Primer. Posted on
June 19, 2011 by

j2kun. Story Time.

Linear algebra was
founded around
the same time as

Calculus (think
Leibniz, circa 1700)

solely for the
purpose of solving
general systems of
linear equations.

Series

unctions/equations.

A linear equation is one in which each term is either a

constant or the

product of a

constant and the

rst power of a

single variable. A

linear function is

one which obeys

the two properties

$f(x) + f(y) = f(x + y)$

and $f(cx) = cf(x)$.
