Chomsky ' s apparently simple political stance is rooted in an anarchism and collectivism which generates its own sense of individuality and complexity. He was drawn to the study of language and syntax by a mentor, Zellig Harris, who also combined libertarianism with linguistics.

For and against Chomsky | Prospect Magazine

Aspects of the Theory of Syntax is a book on linguistics written by American linguist Noam Chomsky, first published in 1965. In Aspects, Chomsky presented a deeper, more extensive reformulation of transformational generative grammar, a new kind of syntactic theory that he had introduced in the 1950s with the publication of his first book, Syntactic Structures. Aspects is widely considered to be the foundational document and a proper book-length articulation of Chomskyan theoretical framework of

Aspects of the Theory of Syntax - Wikipedia

Linguistic Contributions to the Study of Mind Noam Chomsky Excerpted from Language and Mind, 1998. In discussing the past, I referred to two major traditions that have enriched the study of language in their separate and very different ways; and in my last lecture, I tried to give some indication of the topics that seem on the immediate horizon today, as a kind of synthesis of philosophical ...
