These timely and controversial subjects are at the very essence of Adrienne Clarkson ' s 2014 Massey Lectures, Belonging: The Paradox of Citizenship. Clarkson masterfully chronicles the evolution of citizenship throughout the ages: from the genesis of the idea of citizenship in pre-history, to Aristotle and the Greeks, to the medieval structures of guilds and class; from the warring factions of the French revolution, to Icelandic law-making tradition, and present-day modern citizenship based ...

Belonging: The Paradox of Citizenship - PublishersWeekly.com

Yet citizenship is not the same as territorial belonging. As a set of claims on rights, it is also contradictory, ambiguous, multiplicitous, and inextricably tied to powerful acts of deterritorialization. Historically, race and gender have determined who is a citizen and can participate in public life, and how fully.

Adrienne Clarkson ' s Belonging: The Paradox of Citizenship ...

She posits citizenship as the vehicle through which belonging, and therefore fulfillment, can be achieved. Her exploration culminates in her concluding remarks that identify a paradox of citizenship: " It is that we are most fully human, most truly ourselves, most authentically individual, when we commit to the community.

Belonging – House of Anansi Press

Theology of Global Citizenship: Belonging Beyond Boundaries, God Within Boundaries Jisoo Hong Macalester College, jisoo89@gmail.com ... What we find in the enclosure is the paradox of bounded unboundedness. Such enclosure is a necessity for human beings.

Never has the world experienced greater movement of peoples from one country to another, from one continent to another. These seismic shifts in population have brought about huge challenges for all societies. In this year ' s Massey Lectures, Canada ' s twenty-sixth Governor General and bestselling author Adrienne Clarkson argues that a sense of belonging is a necessary mediation between an individual and a society. She masterfully chronicles the evolution of citizenship throughout the ages: from the genesis of the idea of the citizen in ancient Greece, to the medieval structures of guilds and class; from the revolutionary period which gave birth to the modern nation-state, to present-day citizenship based on shared values, consensus, and pluralism. Clarkson places particular emphasis on the Canadian model, which promotes immigration, parliamentary democracy, and the rule of law, and the First Nations circle, which embodies notions of expansion and equality. She concludes by looking forward, using the Bhutanese example of Gross National Happiness to determine how we measure up today and how far we have to go to bring into being the citizen, and the society, of tomorrow.

Statelessness in the Caribbean demonstrates how people can be forcibly displaced under nonconflict conditions without having fled a home, and how democracies force people into statelessness—the condition of not being a citizen anywhere—through the cover of bureaucratic procedures, neutral laws, and sovereign claims to determine membership.

Despite being told that we now live in a cosmopolitan world, more and more people have begun to assert their identities in ways that are deeply rooted in the local. These claims of autochthony—meaning " born from the soil " —seek to establish an irrefutable, primordial right to belong and are often employed in politically charged attempts to exclude outsiders. In *The Perils of Belonging*, Peter Geschiere traces the concept of autochthony back to the classical period and incisively explores the idea in two very different contexts: Cameroon and the Netherlands. In both countries, the momentous economic and political changes following the end of the cold war fostered anxiety over migration. For Cameroonians, the question of who belongs where rises to the fore in political struggles between different tribes, while the Dutch invoke autochthony in fierce debates over the integration of immigrants. This fascinating comparative perspective allows Geschiere to examine the emotional appeal of autochthony—as well as its dubious historical basis—and to shed light on a range of important issues, such as multiculturalism, national citizenship, and migration.

In this witty and provocative study of sex and marriage manuals, M.E. Melody and Linda M. Peterson reveal that permissiveness, prohibition, and, tellingly, persuasion and enforcement—from sermons and hellfire to mutilation and electroshock—have informed popular sex education over the past hundred and twenty years. From the late Victorian obsession with masturbation and hygiene, to the "if it feels good, do it" ethos of *The Joy of Sex*, America's disposition to sex has evolved from a general squeamishness to a veritable cult of mutual orgasm. But despite the recent emphasis on "voluptuous pleasure," the basic power dynamic underlying the discourse on sex has been remarkably resistant to change. The authors reveal that, even as sexual behavior changed during periods of upheaval, the prescriptive literature on sex has remained traditional at its core, promoting sex within marriage for the purpose of reproduction. A cross-generational account of the major constructions of masculinity and femininity from 1880 to the present day, *Teaching America About Sex* serves up a lucid and entertaining reading of the twentieth century's vexed relationship with sex.

Immigration is continuously and rapidly changing the face of Western countries. While newcomers are harbingers of change, host nations

also participate in how new populations are incorporated into their social and political fabric. Bringing together a transcontinental group of anthropologists, this book provides an in-depth look at the current processes of immigration, political behavior, and citizenship in both the United States and Europe. Essays draw on issues of race, national identity, religion, and more, while addressing questions, including: How should citizenship be defined? In what ways do immigrants use the political process to achieve group aims? And, how do adults and youth learn to become active participants in the public sphere? Among numerous case studies, examples include instances of racialized citizenship in “Algerian France,” Ireland’s new citizenship laws in response to asylum-seeking mothers, the role of Evangelical Christianity in creating a space for the construction of an identity that transcends state borders, and the Internet as one of the new public spheres for the expression of citizenship, be it local, national, or global.

In an era when many young people feel marginalized and excluded, this is the first comprehensive, critical account to shed new light on the trouble of ‘belonging’ and how young people in schools understand, enact and experience ‘belonging’ (and non-belonging). It traverses diverse dimensions of identity, including gender and sexuality; race, class, nation and citizenship; and place and space. Each section includes a provocative discussion by an eminent and international youth scholar of youth, and is essential reading for anyone involved with young people and schools. This book is a crucial resource and reference for sociology of education courses at all levels as well as courses in student inclusion, equity and student well-being.

Citizenship is often assumed to be a clear-cut issue—either one has it or one does not. However, as the contributors to *Citizenship in Question* demonstrate, citizenship is not self-evident; it emerges from often obscure written records and is interpreted through ambiguous and dynamic laws. In case studies that analyze the legal barriers to citizenship rights in over twenty countries, the contributors explore how states use evidentiary requirements to create and police citizenship, often based on fictions of racial, ethnic, class, and religious differences. Whether examining the United States’ deportation of its own citizens, the selective use of DNA tests and secret results in Thailand, or laws that have stripped entire populations of citizenship, the contributors emphasize the political, psychological, and personal impact of citizenship policies. *Citizenship in Question* incites scholars to revisit long-standing political theories and debates about nationality, free movement, and immigration premised on the assumption of clear demarcations between citizens and noncitizens. Contributors: Alfred Babo, Jacqueline Bhabha, Jacqueline Field, Amanda Flaim, Sara L. Friedman, Daniel Kanstroom, Benjamin N. Lawrance, Beatrice McKenzie, Polly J. Price, Rachel E. Rosenbloom, Kim Rubenstein, Kamal Sadiq, Jacqueline Stevens, Margaret D. Stock

From anxiety about Muslim immigrants in Western Europe to concerns about undocumented workers and cross-border security threats in the United States, disputes over immigration have proliferated and intensified in recent years. These debates are among the most contentious facing constitutional democracies, and they show little sign of fading away. Edited and with an introduction by political scientist Rogers M. Smith, *Citizenship, Borders, and Human Needs* brings together essays by leading international scholars from a wide range of disciplines to explore the economic, cultural, political, and normative aspects of comparative immigration policies. In the first section, contributors go beyond familiar explanations of immigration's economic effects to explore whose needs are truly helped and harmed by current migration patterns. The concerns of receiving countries include but are not limited to their economic interests, and several essays weigh different models of managing cultural identity and conflict in democracies with large immigrant populations. Other essays consider the implications of immigration for politics and citizenship. In many nations, large-scale immigration challenges existing political institutions, which must struggle to foster political inclusion and accommodate changing ways of belonging to the polity. The volume concludes with contrasting reflections on the normative standards that should guide immigration policies in modern constitutional democracies. *Citizenship, Borders, and Human Needs* develops connections between thoughtful scholarship and public policy, thereby advancing public debate on these complex and divisive issues. Though most attention in the collection is devoted to the dilemmas facing immigrant-receiving countries in the West, the volume also explores policies and outcomes in immigrant-sending countries, as well as the situation of developing nations—such as India—that are net receivers of migrants.

Community as the Material Basis of Citizenship addresses community as the site of participation, production, and rights of citizens and brings to bear a profound critique of a collective process that has historically excluded working class communities and communities of color from any real governance. The argument is that the status of citizenship has been influenced by a society that emphasizes the role of property in defining legitimacy and power and therefore idealizes and institutionalizes citizenship from an individualistic perspective. This system puts the onus on the individual citizen to participate in their governance, while the political reality is that organizations and corporations and their interests have great power to influence and govern. The chapters present an exciting departure from the long-standing traditions of the social basis of citizenship. In *Community as the Material Basis of Citizenship*, Rodolfo Rosales and his contributors argue that citizenship is a communally embedded and/or socially constituted phenomenon. Hence, the unfinished story of American Democracy is not in the equalization of communities but rather in their ability to participate in their own governance – in their empowerment.

This book explores the social and political significance of contemporary recognition contests in areas such as disability, race and ethnicity, nationalism, class and sexuality, drawing on accounts from Europe, the USA, Latin America, the Middle East and Australasia.
