This is a collection of sources in Chinese religion, tailored for courses in that subject. It will be the only currently available text of its kind. Selections will be arranged chronologically by dynasty rather than thematically, and the editor will provide substantial introductions to each section.

This series provides succinct and balanced overviews of the religions of the world. Written in an accessible and informative style, and assuming little or no prior knowledge on the part of the reader, each book gives a basic introduction to the faith--its history, beliefs, and practices--and emphasizes modern developments and the role and impact of the religion in today's world. Chinese Religious Traditions provides a concise introduction to the history of religion in China and its ramifications in China today. Focusing on the four major religious traditions of Confucianism, Daoism, Buddhism, and popular religion, this book covers the religious and ethical ideas as well as the practices within each tradition. The book traces themes that are common to Chinese society from earliest times to the present day. It also highlights the ways in which each tradition has responded to and influenced political and cultural change.

This third volume of Princeton Readings in Religions demonstrates that the "three religions" of China--Confucianism, Daoism, and Buddhism (with a fourth, folk religion, sometimes added)--are not mutually exclusive: they overlap and interact with each other in a rich variety of ways. The volume also illustrates some of the many interactions between Han culture and the cultures designated by the current government as "minorities." Selections from minority cultures here, for instance, are the folktale of Ny Dan the Manchu Shamaness and a funeral chant of the Yi nationality collected by local researchers in the early 1980s. Each of the forty unusual selections, from ancient

oracle bones to stirring accounts of mystic visions, is preceded by a substantial introduction. As with the other volumes, most of the selections here have never been translated before. Stephen Teiser provides a general introduction in which the major themes and categories of the religions of China are analyzed. The book represents an attempt to move from one conception of the "Chinese spirit" to a picture of many spirits, including a Laozi who acquires magical powers and eventually ascends to heaven in broad daylight; the white-robed Guanyin, one of the most beloved Buddhist deities in China; and the burning-mouth hungry ghost. The book concludes with a section on "earthly conduct."

The inaugural volume of Princeton Readings in Religions brings together the work of thirty scholars of the religions of India in a new anthology designed to reshape the ways in which the religious traditions of India are understood. The book contains translations of forty-five works, most of which have never before been available in a Western language. Many of these highlight types of discourse (especially ritual manuals, folktales, and oral narratives) and voices (vernacular, esoteric, domestic, and female) that have not been sufficiently represented in previous anthologies and standard accounts of Indian religions. The selections are drawn from ancient texts, medieval manuscripts, modern pamphlets, and contemporary fieldwork in rural and urban India. They represent every region in South Asia and include Hindu, Buddhist, Jain, Sikh, and Muslim materials. Some are written texts reflecting elite concerns, while others are transcriptions of oral narratives told by nonliterate peasants. Some texts are addressed to a public and pan-Indian audience, others to a limited coterie of initiates in an esoteric sect, and still others are intended for a few women gathered in the courtyard for a household ceremony. The editor has reinforced this diversity by arranging the selections within several overarching themes and categories of discourse (hymns, rituals, narratives, and religious interactions), and encourages us to make our own connections.

Features a whirlwind tour of the religions of China.

The first major reassessment of ancient Chinese religion to appear in recent years, this book presents the religious mentality of the period through personal and daily experiences.

The acclaimed volumes of Princeton Readings in Religions present the remarkable range of all that is encompassed in the practice of religions, across the centuries and across the world. Religions of Asia in Practice: An Anthology brings together into a single volume the most important and fascinating selections from the volumes on Buddhism, India, China, Tibet, and Japan to give an overview of how religions have been lived by both ordinary and extraordinary people throughout the continent of Asia. These materials--many of which had never before been translated into any Western language--include ritual manuals, hagiographical and autobiographical writings, popular commentaries, instructions to children, poetry, and folktales. Each is preceded by a substantial introduction in which the translator discusses the text's history and influence and guides the reader through points of potential difficulty and particular interest. The volume includes, in addition, clear and compelling introductions to each of the major traditions. Religions of Asia in Practice: An Anthology offers a fascinating look at the spectrum of religious practices in Asia over almost three millennia. As such, it is ideally suited for use as a textbook in courses on world or Eastern religions as well as for the general reader.

Read Free Chinese Religion An Anthology Of Sources

A long-awaited textbook that introduces the major schools, teachings, and practices of Daoism, this work presents a chronological survey that is thematically divided into four parts: Ancient Thought, Religious Communities, Spiritual Practices, and Modernity. The work offers an integrated vision of the Daoist tradition in its historical and cultural context, establishing connections with relevant information on Confucianism, Chinese Buddhism, popular religion, and political developments. It also places Daoism into a larger theoretical and comparative framework, relating it to mysticism, millenarianism, forms of religious organization, ritual, meditation, and modernity. The book makes ample use of original materials and provides references to further readings and original sources in translation. It is a powerful resource for teaching and studying alike.

From the Pulitzer Prize winning journalist: a revelatory portrait of religion in China today its history, the spiritual traditions of its Eastern and Western faiths, and the ways in which it is influencing China's future. Following a century of violent antireligious campaigns, China is now awash with new temples, churches, and mosques as well as cults, sects, and politicians trying to harness religion for their own ends. Driving this explosion of faith is uncertainty over what it means to be Chinese, and how to live an ethical life in a country that discarded traditional morality a century ago and is still searching for new guideposts. Ian Johnson lived for extended periods with underground church members, rural Daoists, and Buddhist pilgrims. He has distilled these experiences into a cycle of festivals, births, deaths, detentions, and struggle - a great awakening of faith that is shaping the soul of the world's newest superpower. (With black-and-white illustrations throughout).

This magisterial Norton Anthology, edited by world-renowned scholars, offers a portable library of more than 1,000 primary texts from the world ' s major religions. To help readers encounter strikingly unfamiliar texts with pleasure; accessible introductions, headnotes, annotations, pronouncing glossaries, maps, illustrations and chronologies are provided. For readers of any religion or none, The Norton Anthology of World Religions opens new worlds that, as Miles writes, invite us "to see others with a measure of openness, empathy, and good will..."

Unprecedented in scope and approach, The Norton Anthology of World Religions: Christianity brings together over 150 texts from the Apostolic Era to the New Millennium. The volume features Jack Miles ' s illuminating General Introduction— “ How the West Learned to Compare Religions ” —as well as Lawrence S. Cunningham ' s “ The Words and the Word Made Flesh, ” a lively primer on the history and core tenets of Christianity.
