## Discrete And Combinatorial

Mathematics Grimaldi

Many first year courses in discrete math usually focus on two or three major topics: combinatorics and finite automata, recurrence and generating functions, and graph theory. The good thing about this book is that it covers all of it in good detail for a undergrad course.

Mathematics

me a love of discrete mathematics.

It has great coverage of combinatorics, set theory, graph theory, finite state machines. The examples are great although they jump from basic to advanced pretty rapidly. I'm a math major, and this has been my favorite

manual/ Chapter 2 Exercises 2.1

The electric field outside a  
charged sphere is the same as for  
a point source,  $E(r) = \frac{Q}{4\pi\epsilon_0 r^2}$   
where  $Q$  is the charge on the inner  
surface of radius  $a$ .
