The domestic dog's origin includes the dog's genetic divergence from the wolf, its domestication, and its development into dog types and dog breeds. The dog is a member of the genus *Canis*, which forms part of the wolf-like canids, and was the first species and the only large carnivore to have been domesticated. Genetic studies comparing dogs with

Dogs (*Canis lupus familiaris*) are domesticated mammals, not natural wild animals. They were originally bred from wolves. They have been bred by humans for a long time, and were the first animals ever to be domesticated. There are different studies that suggest that this happened between 15.000 and 100.000 years before our time.
