Replace the insulation paper lining the stator if necessary. First, pull out the old paper out of the slots in the stator using a pair of pliers or tweezers and make sure the empty slots are free of debris. Then, measure the width of the slots and cut a sheet of insulation paper into strips of the same width.

Motor rewinding is 10% materials and 90% labor cost. It takes no less or

more time to burn out, cut and strip a 1/4hp stator than a 10hp. In fact, the tiny slots of the small motor make it a royal PITA to wind. I'd count on a minimum of \$300 or more. As said above, buy a new pump and only when you need it.
