The key findings are: both the developing and developed countries could be benefits from the process of globalization. However, because the advantages such as technology, education, finance and management, the growth rapid of developed country is much higher than developing country. It could lead to

*[(Globalization and the
Least Developed
Countries ...*

A way of classifying the economic growth of countries is to divide them into three groups: (a) industrialized, (b) developing, and (c) less-developed nations.

Industrialized nations have economies characterized by a healthy climate for
