~~High risk pregnancies, however, remain the remit of the obstetrician. Although an increasing proportion of this workload is being directed towards those with a dedicated interest in perinatal medicine, all obstetricians deal with a variety of maternal and fetal problems every day. We are also in the era of the randomised trial.~~

More pregnancies are considered high-risk than ever before. As many as 30 percent fall into this category due to complicating factors that include:

For the maternal-fetal physician, constant vigilance throughout a pregnancy remains essential. But continuous change makes this an increasing challenge. Queenan's Management of High-Risk Pregnancy covers the full spectrum of perinatal care. Providing evidence, algorithms, and case studies, this book guides you through the tough and complex decisions needed to protect the health of both your fetal and the maternal patients. New material in the

6th edition covers contemporary issues such as, iron-deficient anemia, malaria, pregnancy in the disabled woman, placenta accrete, induction of labor, operative vaginal delivery, and patient safety in labor and delivery. Written by experts in the field, no obstetrician or obstetric health care provider can afford to miss Queenan's Management of High-Risk Pregnancy.

Human Assisted Reproductive Technology: Future Trends in Laboratory and Clinical Practice offers a collection of concise, practical review articles on cutting-edge topics within reproductive medicine. Each article presents a balanced view of clinically relevant information and looks ahead to how practice will change over the next five years. The clinical section discusses advances in reproductive surgery and current use of robotic surgery for tubal reversal and removal of fibroids. It looks into the refinement of surgical procedures for fertility preservation purposes. Chapters also discuss non-invasive diagnosis of endometriosis with proteomics technology, new concepts in ovarian stimulation and in the management of polycystic ovary syndrome, and evidence-based ART. The embryology section discusses issues ranging from three-dimensional in-vitro ovarian follicle culture, and morphometric and proteomics analysis of embryos, to oocyte and embryo cryopreservation. This forward-looking volume of review articles is key reading for reproductive medicine physicians, gynecologists, reproductive endocrinologists, urologists and andrologists.

This book is a must-have for all health professionals involved in the care of women with high risk pregnancies. It is a concise and practical resource for all perinatal care and a reference

for the diagnosis and management of high risk pregnancy. The fifth edition of this classic, focuses on factors affecting pregnancy, genetics, practical diagnostic techniques, maternal diseases in pregnancy and pregnancy complications, labor, anesthesia, and neonatal considerations. Dr Queenan is joined in the fifth edition by a new editor, Catherine Spong. The book will take an explicitly evidence-based approach this time around and will expand upon several important areas; genetics, doppler ultrasound, prevention, AIDS, group B streptococcus, preeclampsia, and prematurity.

It has been enormously satisfying to prepare the third edition of Anesthetic and Obstetric Management of High-Risk Pregnancy because it fulfills the need for close communication between two specialties, anesthesiology and obstetrics. This relationship is necessary not only to take care of the sick parturient, but also to deliver a healthy baby. New developments in obstetrics and in obstetric anesthesia necessitated this third edition. Most of the contributors to this edition are new, and they have provided information on the latest approaches, as well as updated information. In addition, Chapter 13, “ Critical Care Anesthesia for High-Risk Parturients, ” is completely new. Like earlier editions, the third edition includes contributions from an international team of experts in the field of obstetric anesthesia and obstetrics. I thank all the authors for their valuable contributions. The authors have expressed their own opinions and recommendations, which do not necessarily reflect my own views. I also wish to thank Ms. Elizabeth Kiernan for her endless help in completing the new edition. I sincerely hope this edition will further reinforce the concept of the team approach for taking care of the high-risk parturient.
