Recent Advances in Obstetrics and Gynaecology: 25 features a collection of in depth reviews of the latest trends in the field. Written in an accessible and easy to read format and featuring such topics as enhanced recovery in obstetric & gynaecological surgery, modern management of ectopic pregnancy and non-invasive prenatal diagnosis, each chapter provides a comprehensive overview, and emphasises the salient points of interest. This latest volume in the series is an invaluable resource for both busy clinicians and those sitting RCOG membership examinations. *13 chapters summarising important recent advances within the field of obstetrics and gynaecology * All topics are written in a practical and clinically relevant manner, further enhanced by the 'key clinical points for practice' sections at the end of each chapter * Provides an effective exam revision tool for MRCOG(UK) * All chapters written by expert authors ensuring authoritative and accurate content * Full colour photographs throughout.

Under pressure and support from the federal government, states have increasingly turned to indicators based on student test scores to evaluate teachers and schools, as well as students themselves. The focus thus far has been on test scores in those subject areas where there is a sequence of consecutive tests, such as in mathematics or English/language arts with a focus on grades 4-8. Teachers in these subject areas, however, constitute less than thirty percent of the teacher workforce in a district. Comparatively little has been written about the measurement of achievement in the other grades and subjects. This volume seeks to remedy this imbalance by focusing on the assessment of student achievement in a broad range of grade levels and subject areas, with particular attention to their use in the evaluation of teachers and schools in all. It addresses traditional end-of-course tests, as well as alternative measures such as portfolios, exhibitions, and student learning objectives. In each case, issues related to design and development, psychometric considerations, and validity challenges are covered from both a generic and a content-specific perspective. The NCME Applications of Educational Measurement and Assessment series includes edited volumes designed to inform research-based applications of educational measurement and assessment. Edited by leading experts, these books are comprehensive and practical resources on the latest developments in the field. The NCME series editorial board is comprised of Michael J. Kolen, Chair; Robert L. Brennan; Wayne Camara; Edward H. Haertel; Suzanne Lane; and Rebecca Zwick.
