Charlotte is out in the woods on her own one day when something mysterious happens - she walks along a row of stones laid like stepping stones on the forest floor . . . and finds herself in another age. She has somehow slipped back to 1955, and is now, in the same woods, on the site of a very unique school, an open-air school for sick city children. No one believes her tales of the world she's come from, her mobile doesn't work and she can't see how on earth she's going to get back. A friendship with another pupil proves the key - is Jack more than he seems?

A new collection of prophetic essays from one of the sharpest practitioners of the form Mark Slouka writes from a particular vantage point, one invoked by Thoreau, who wished "to improve the nick of time . . . to stand on the meeting of two eternities, the past and future." At this bewildering convergence, Slouka asks us to consider what it means to be human and what we must revive, or reject, in order to retain our humanity in the modern world. Collected over fifteen years, these essays include fascinating explorations of the relationship between memory and history and the nature of "tragedy" in a media-driven culture; meditations on the transcendent "wisdom" of the natural world and the role of silence in an age of noise; and arguments in defense of the political value of leisure time and the importance of the humanities in an age defined by the language of science and industry. Written in Slouka's supple and unerring prose, celebratory, critical, and passionate, Essays from the Nick of Time reawakens

us to the moment and place in which we find ourselves, caught between the fading presence of the past and the neon lure of the future.

Nick Saint never really put a lot of thought into his name until one snowy day in December when he accidentally receives a letter meant for Saint Nick. Realizing there is not much time left until Christmas, Nick opens the letter. The unexpected message inside ultimately leads him on a journey of understanding poverty, gratitude, and service to others while discovering the real meaning of the holiday spirit. Nick's actions and kindness are filled with heartwarming results that even please Santa Claus himself! An endearing story of a little brown boy who helps Santa save Christmas. Children of all ages and backgrounds who read *In the Nick of Time* will understand that sometimes the smallest act of kindness can take up the biggest space in someone else's heart.

In this pathbreaking philosophical work, Elizabeth Grosz points the way toward a theory of becoming to replace the prevailing ontologies of being in social, political, and biological discourse. Arguing that theories of temporality have significant and underappreciated relevance to the social dimensions of science and the political dimensions of struggle, Grosz engages key theoretical concerns related to the reality of time. She explores the effect of time on the organization of matter and on the emergence and development of biological life. Considering how the relentless forward movement of time might be conceived in political and social terms, she begins to formulate a model of time that incorporates the future and its capacity to supersede and transform the past and present. Grosz develops her argument by juxtaposing the work of three major figures in Western thought: Charles Darwin, Friedrich Nietzsche, and Henri Bergson. She reveals that in theorizing time as an active, positive phenomenon with its own characteristics and specific effects, each of these thinkers had a profound effect on contemporary understandings of the body in relation to time. She shows how their allied concepts of life, evolution, and becoming are manifest in the work of Gilles Deleuze and Luce Irigaray. Throughout *The Nick of Time*, Grosz emphasizes the political and cultural imperative to fundamentally rethink time: the more clearly we understand our temporal location as beings straddling the past and the future without the security of a stable and abiding present, the more transformation becomes conceivable.

Nick of Time is the first young reader's book written by bestselling author Ted Bell - a wondrous tale of time travel, adventure, and riches, in which twelve-year-old Nick McIver sets out to become "the hero of his own life." The setting is England, 1939, on the eve of war. Nick and his younger sister, Kate, live in a lighthouse on the smallest of the Channel Islands. Nick and Kate come to the aid of their father who is engaged in a desperate war of espionage with German U-boat wolf packs that are circling the islands. The information they provide to Winston Churchill is vital as he tries to warn England of the imminent Nazi invasion. One day Nick discovers an old sea chest, left for him by his ancestor, Captain Nicholas McIver of the Royal Navy. Inside, he finds a time machine and a desperate plea for help from the captain. He uses the machine to return to the year 1805. Captain McIver and, indeed, Admiral Nelson's entire fleet are threatened by the treachery of the French and the mutinous Captain Billy Blood. Nick must reach deep inside, using his wits, courage, and daring to rescue the imperiled British sailors. His sister, Kate, meanwhile, has enlisted the aid of two of England's most brilliant "scientific detectives," Lord Hawke and Commander Hobbes, to thwart the invading Nazis. She and Nick must face England's underwater enemies, a challenge made all the more difficult when they discover the existence of Germany's supersecret submarine. In this striking adventure for readers of all ages, Nick must fight ruthless enemies across two different centuries, on land and sea, to help defeat those determined to destroy his home and his family.

In the Nick of Time is a collection of stories that flow with humor, mystery, and the dangerous possibilities of imagination. With traces of empathy and irony, these 32 stories explore human connections in a space between wakefulness and sleep, today and yesterday that is reminiscent of The Twilight Zone.

Prominent feminist theorist rethinks the relationship between evolution and the biological body through the study of three key figures--Darwin, Nietzsche, and Bergson./div

By the famous Big Reel columnist: the story of serials from Universal's 1930 The Indians Are Coming to Columbia's 1956 Blazing the Overland Trail. Fifteen fascinating chapters explain the importance of "cliffhangers" to the industry as audience builders and "product leaders." The serials provided training for actors and served as a "technical university" for people who later made the television industry work. An appendix lists in order of release all of the sound serials from 1930 through 1956, showing titles, releasing companies, chapter titles, directors and several cast members. Superb photographs.

This is the definitive biography of the Grammy Award-winning singer/songwriter and political activist whose career rose rapidly in the 1970Us, stalled in the 1980Us, and resurged in the 1990Us. 29 photos.

In this short story from the thrilling anthology FaceOff, bestselling authors Ian Rankin and Peter James—along with their most famous characters, John Rebus and Roy Grace—team up for the first time ever. Detectives John Rebus and Roy Grace could not be more different. Different generations, different backgrounds, and not to mention, they work 500 miles apart. The case that eventually brings them together centers on a crime that happened when Rebus was just a teenager in the 1960s—but it took place in Roy Grace's stomping grounds in Brighton, England, at a time when violence erupted between rival gangs known as Mods and Rockers. Now, a deathbed confession in Edinburgh brings Rebus and Grace together to investigate a cold case with a shocking twist. For more exciting pairs, check out all eleven stories in FaceOff!
