governance arrangements should promote the safety and efficiency of the payment system and support the stability of the broader financial system. (1) The SS sets out in more detail what the Bank expects a systemic risk manager to deliver. This includes considering how RPSOs' actions may impact financial

Policy Statement: Code of Practice and supervisory ...

of the payment systems. Representation of service users and the need to foster inclusive decision-making across the industry appears to be secondary. The governance and ownership of the three card payment systems is more commercially focused. Service user representation is less of a concern, although the weak position of merchants to

A Review of Governance and Ownership of UK Payment Systems

3.7 Ownership and governance of the Operators ultimately determines how is exercised control over the payment systems in terms of their operation, access and development.

Ownership, governance and control of payment systems

A payment system is any system used to settle financial transactions through the transfer of monetary value. This includes the institutions, instruments, people, rules, procedures, standards, and technologies that make its exchange possible. A common type of payment system is called an operational network that links bank accounts and provides for monetary exchange using bank deposits. Some payment systems also include credit mechanisms, which are essentially a different aspect of payment. Payment
