All of the critical technical aspects of gear materials technology are addressed in this new reference work. Gear Materials, Properties, and Manufacture is intended for gear metallurgists and materials specialists, manufacturing engineers, lubrication technologists, and analysts concerned with gear failures who seek a better understanding of gear performance and gear life. This volume complements other gear texts that emphasize the design, geometry, and theory of gears. The coverage begins with an overview of the various types of gears used, important gear terminology, applied stresses and strength requirements associated with gears, and lubrication and wear. This is followed by in-depth treatment of metallic (ferrous and nonferrous alloys) and plastic gear materials. Emphasis is on the properties of carburized steels, the material of choice for high-performance power transmission gearing.

This book constitutes the refereed proceedings of the Second International Conference on Smart Trends in Information Technology and Computer Communications, SmartCom 2017, held in Pune, India, in August 2017. The papers address issues on smart and secure systems; smart and service computing; smart data and IT innovations.

The Brahmaputra is one of the world's great rivers. Beginning as a tiny glacial stream in Western Tibet it flows through India and Bangladesh before gushing out into the Bay of Bengal. Unable to reach the northern part of the river due to Chinese intransigence, Mark Shand nonetheless set out to attempt what no foreigner had ever done: complete the huge journey from the unexplored jungles of the Indo-Tibet border to the largest river delta in the world. RIVER DOG is a chronicle of that journey, a remarkable story encompassing sublime landscapes - in Assam where the River begins to broaden into its full majesty - and rather odd encounters - including a bizarre group of identical-looking monks in Majuli (the largest river island in the world). But it is also a celebration -- of a river that flows with mystery and legend, the men who have set out to discover it and a rather charming canine travelling companion called Bhaiti.

A riveting novel about the tragic romance that nearly destroyed a young Pablo Picasso--while granting him his first flight of creative genius. From rowdy Barcelona barrooms to the incandescent streets of turn-of-the-century Paris, Pablo Picasso experiences the sumptuous highs and seedy lows of bohemian life alongside his rebellious poet friend with a shadowy past, Carles Casagemas. Fleeing family misfortune and their parents' expectations, the two young artists seek their creative outlet while chasing inspiration in drugs, decadence, and the liberated women of Montmartre--creatures far different from the veiled ones back home. The new life feels like bliss, and nothing can come between them...until a dark-haired, enigmatic muse enters the picture. The two artists' passion for Germaine will lead to a devastating turn. Amid soul-searching and despair, however, Picasso discovers a color palette in which to render his demons and paint himself into lasting history. Bringing the exuberance of the era vividly to life, this richly imagined portrait of Picasso's coming of age intertwines the love, death, lust, and friendships that inspired the immortal works of a defiant master.

Before the witchcraft revival of 20th century popular occultism, witches and their arts of malevolent magic were recognized as real and constituted ever-present threats to the community. Spells and charms against the evil influence of witches were a common feature of rural English life, and form a unique --and sometimes sinister-- corpus of folk magic similar in its features to the baneful magical operations witches were accused of. Through the use of incantations, herbs, talismans, spirit compacts, gestures, and prayers, a practitioner of British folk-sorcery could overcome the power of magical ill-doers using time-tested and traditional methods of magic. From the forgotten archives of nineteenth century folklore and first-hand reports of the period, occult researcher Andrew Mercer has gathered a collection of the more obscure and lesser-known examples of the fascinating magical art of anti-bewitchment, expelling, binding and cursing.
