Presents more than four hundred lists on various information on cats, including cat breeds, training, and behavior, as well as such topics as famous cats in history, cat food recipes, and gifts for pampered cats.

Lonely Planet West Africa is your passport to the most relevant, up-to-date advice on what to see and skip, and what hidden discoveries await you. Explore the Senegalese music scene in Dakar, sun yourself in the coastal paradise of Freetown, or hike through lush highlands in Kpalime; all with your trusted travel companion.

George Monbiot’s Heat: How to Stop the Planet from Burning marks an important moment in our civilization’s thinking about global warming. The question is no longer whether climate change is actually happening. The question is what to do about it. Monbiot offers an ambitious and far-reaching program to cut our carbon dioxide emissions to the point where the environmental scales start tipping away from catastrophe. (But not before he devotes a chapter to unmasking the vested interests that have spent fortunes funding the specious science of the climate change deniers.) It now seems certain that we need a 90% cut in our emissions by 2030 to prevent runaway climate change from taking place. For the first time, this book explains how the cut could be achieved without bringing industrial civilisation to an end. Combining his unique knowledge of political campaigning and environmental science, Monbiot analyses the potential of energy efficiency, renewable resources, carbon burial, nuclear power and new transport and building systems to discover what works, what doesn’t, what costs the least and what needs to be done to make change happen. He is not afraid to attack anyone — friend or foe — whose claims are false or whose figures have been fudged. His original, sometimes shocking programme shows that we can reconcile our demands for comfort and security with the survival of the biosphere. Rigorous, passionate and totally surprising, this book could change the world. It is possible to slow the momentum of this global crisis — if we act decisively. In this riveting, fiery book, the No Logo of the environmental movement, George Monbiot shows us how.

This book is for anyone who owns, or is thinking of owning, a Vixen Star Book Ten telescope mount or its predecessor. A revolution in amateur astronomy has occurred in the past decade with the wide availability of high tech, computer-driven, Go-To telescopes. Vixen Optics is leading the way by offering the Star Book Ten system, with its unique star map graphics software. The Star Book Ten is the latest version of computer telescope control using star map graphics as a user interface, first introduced in the original Star Book first offered in 2003. The increasingly complicated nature of this software means that learning to optimize this program is not straightforward, and yet the resulting views when all features are correctly deployed can be phenomenal. After a short history of computerized Go-To telescopes for the consumer amateur astronomer market, Chen offers a treasury of technical information. His advice, tips, and solutions aid the user in getting the most out of the Star Book Ten system in observing sessions.

More than just a travel guide, the Tokyo CompleteResidents' Guide is your guide to life in one of theworld's most exciting cities. Written by residents, forresidents, the sheer volume of insider information has nocomparison. From housing and work to exploring the cityand beyond; and from sports clubs and shopping to findingthe best .....

Provides an overview of the sustainable energy crisis that is threatening the world's natural resources, explaining how energy consumption is estimated and how those numbers have been skewed by various factors and discussing alternate forms of energy that can and should be used.

Red Schuhart is a stalker, one of those young rebels who are compelled, in spite of extreme danger, to venture illegally into the Zone to collect the mysterious artifacts that the alien visitors left scattered around. His life is dominated by the place and the thriving black market in the alien products. But when he and his friend Kirill go into the Zone together to pick up a "full empty," something goes wrong. And the news he gets from his girlfriend upon his return makes it inevitable that he'll keep going back to the Zone, again and again, until he finds the answer to all his problems. First published in 1972, "Roadside Picnic" is still widely regarded as one of the greatest science fiction novels, despite the fact that it has been out of print in the United States for almost thirty years. This authoritative new translation corrects many errors and omissions and has been supplemented with a foreword by Ursula K. Le Guin and a new afterword by Boris Strugatsky explaining the strange history of the novel's publication in Russia.

Gives ratings, descriptions, and company information about Web pages produced by companies and corporations

This open access book explores the global challenges and experiences related to digital entrepreneurial activities, using carefully selected examples from leading companies and economies that shape world business today and tomorrow. Digital entrepreneurship and the companies steering it have an enormous global impact; they promise to transform the business world and change the way we communicate with each other. These companies use digitalization and artificial intelligence to enhance the quality of decisions and augment their business and customer operations. This book demonstrates how cloud services are continuing to evolve; how cryptocurrencies are traded in the banking industry; how platforms are created to commercialize business, and how, taken together, these developments provide new opportunities in the digitalized era. Further, it discusses a wide range of digital factors changing the way businesses operate, including artificial intelligence, chatbots, voice search, augmented and virtual reality, as well as cyber threats and data privacy management. “Digitalization mirrors the Industrial Revolution’s impact. This book provides a complement of perspectives on the opportunities emanating from such a deep seated change in our economy. It is a comprehensive collection of thought leadership mapped into a very useful framework. Scholars, digital entrepreneurs and practitioners will benefit from this timely work.” Gina O’Connor, Professor of Innovation Management at Babson College, USA “This book defines and delineates the requirements for companies to enable their businesses to succeed in a post-COVID19 world. This book deftly examines how to accomplish and achieve digital entrepreneurship by leveraging cloud computing, AI, IoT and other critical technologies. This is truly a unique “must-read” book because it goes beyond theory and provides practical examples.” Charlie Isaacs, CTO of Customer Connection at Salesforce.com, USA “This book provides digital entrepreneurs useful guidance identifying, validating and building their venture. The international authors developed new perspectives on digital entrepreneurship that can support to create impact ventures.” Felix Staeritz, CEO FoundersLane, Member of the World Economic Forum Digital Leaders Board and bestselling author of FightBack, Germany
