Picking Up the Pieces tells the story of the making of the Witness Blanket, a living work of art conceived and created by Indigenous artist Carey Newman. It includes hundreds of items collected from Residential Schools across Canada, everything from bricks, photos and letters to hockey skates, dolls and braids. Every object tells a story. Carey takes the reader on a journey from the initial idea behind the Witness Blanket to the challenges in making it work to its completion. The story is told through the objects and the Survivors who

donated them to the project. At every step in this important journey for children and adults alike, Carey is a guide, sharing his process and motivation behind the art. It's a very personal project. Carey's father is a Residential School Survivor. Like the Blanket itself, Picking Up the Pieces calls on readers of all ages to bear witness to the Residential School experience, a tragic piece of Canada's history.

Unless you lived through the 1970s, it seems impossible to understand it at all. Drug delirium, groovy fashion, religious cults, mega corporations, glitzy glam, hard rock, global unrest--from our 2018 perspective, the seventies are often remembered as a bizarre blur of bohemianism and disco. With Pick Up the Pieces, John Corbett transports us back in time to this thrillingly tumultuous era through a playful exploration of its music. Song by song, album by album, he draws our imaginations back into one of the wildest decades in history. Rock. Disco. Pop. Soul. Jazz. Folk. Funk. The music scene of the 1970s was as varied as it was exhilarating, but the decade's diversity of sound has never been captured in one book before now. Pick Up the Pieces gives a panoramic view of the era's music and culture through seventy-eight essays that allow readers to dip in and out of the decade at random or immerse themselves completely in Corbett's chronological journey. An inviting mix of skilled music criticism and cultural observation, Pick Up the Pieces is also a coming-of-age story, tracking the author's absorption in music as he grows from age seven to seventeen. Along with entertaining personal observations and stories, Corbett includes little-known insights into musicians from Pink Floyd, Joni Mitchell, James Brown, and Fleetwood Mac to the Residents, Devo, Gal Costa, and Julius Hemphill. A master DJ on the page, Corbett takes us through the curated playlist that is Pick Up the Pieces with captivating melody of language and powerful enthusiasm for the era. This funny, energetic book will have readers longing nostalgically for a decade long past.

The book documents the history, experiences and hardships of an intrepid aircraft engineer in salvaging damaged aircraft in the wilderness of Northern Canada. It describes the difficult and hazardous situations demanding ingenuity, resourcefulness and a lot of difficult hard work. Within the book covers are the stories of the retrievals, temporary repairs and rescues of aircraft from Artic, Tundra, remote areas of Western Canada, lake bottoms, glaciers and trees. It shows the nature of the northern people, their willingness to provide and unreservedly to help in order to finish the job successfully. Denny's over 50 years experience in the aviation field demonstrates a lesser known side of aviation that is from the engineers' and accident investigators' perspective. This book is the first of its' kind and once started, compels the reader to continue to the last page.

The extraordinary and fascinating new book by the author of the award-winning bestseller The Jigsaw Man Forensic psychologist Paul Britton can 'walk through the minds' of those who murder, rape, torture, extort and kidnap. He can see the world through their eyes and know what they're thinking. That is why the police have called on him to help with many high-profile criminal investigations and catch those responsible. How does he do it? Paul Britton's newest book, Picking Up the Pieces, reveals the psychological and forensic foundations upon which he has based his expertise. It is a remarkable journey into the darkest recesses of the human mind. From top security prisons and mental hospitals to ordinary outpatients' clinics, Britton introduces us to his clinical and forensic work. A man turns into a werewolf at four o'clock every afternoon. Another has built an electric chair in his basement to kill his father. A woman accepts the blame for abusing her child when she had nothing to do with it. How can they be helped? When Britton so accurately profiled the child killers of Jamie Bulger in Liverpool, or told police the true nature of Frederick and Rosemary West, he could do so because he had treated disturbed children and confronted sadistic sexual murderers in his consulting room. For twenty-five years Britton has interviewed, assessed and treated people with damaged or broken minds. Some were responsible for terrible crimes, others were stopped before it was too late. The answers aren't hidden at bloody crime scenes or in the post-mortem photographs. Instead, the truth is often locked away within someone's mind or deep in their past. Picking Up the Pieces is not a sequel to Britton's award-winning autobiography The Jigsaw Man, but a companion volume that shows the heart of his work and the knowledge that underpins his conclusions. It is a unique and revealing book that will fascinate and provoke discussion. Paul Britton was born in 1946. Following degrees obtained in psychology from Warwick and Sheffield universities, he has spent the last twenty years working as a consultant clinical and forensic psychologist. He has advised the Association of Chief Police Officers' Crime Committee on offender profiling for many years and currently teaches postgraduates in clinical and forensic psychology. He is married with two children. Paul Britton is the author of Picking Up the Pieces and The Jigsaw Man, which won the Crime Writers' Association Gold Dagger Award for Non-Fiction.
