Pitaya

A pitaya (/ p t a /) or
pitahaya (/ p t h a .
/) is the fruit of several different
cactus species indigenous to the
Americas. Pitaya usually refers to
fruit of the genus *Stenocereus*,
while pitahaya or dragon fruit
refers to fruit of the genus
Hylocereus, [citation needed] both
in the family Cactaceae. Dragon
fruit is cultivated in Southeast
Asia, in the United ...

people of Asian origin. It features a mouth watering light sweet taste, an intense shape and color, not forgetting its outstanding flowers.

Dragon Fruit. Pitaya. Pitahaya.

Dragon Fruit Info.

Pitaya is located in the Upper West Side neighborhood of Manhattan. The home of diverse cultural attractions, the Upper West side is sandwiched between Riverside Park to the west and Central Park to the east. Both parks are excellent leisurely green spaces to spend a day. Central Park is especially notable, as it is New York ' s "flagship" park.

"There is nothing in the world like this book. It should be in every library and on the bookshelves of all those interested in cacti. The book will be an important resource for plant physiology, agronomy,

Get Free Pitaya

and horticulture classes at both the undergraduate and graduate level."—Bruce Smith, Brigham Young University "Cacti: Biology and Uses is a landmark publication of one of the world's most unique group of plants. Park Nobel, a leading authority on succulent plants, has assembled a collection of contributions that spans a wide range of issues extending from basic systematics, anatomy, physiology and ecology to considerations of conservation and human uses of this diverse group of plants. This nicely-produced and well-illustrated volume provides a resource that will be of great use to a wide range of scientists, practitioners, and enthusiasts of this plant group."—Harold Mooney, Paul S.

The health benefit of antioxidant's activities from the betacyanin contents in red Pitaya, attract a lot of interest from the public, food as well as pharmaceutical industries. This natural antioxidant from red Pitaya can replace the dangerous synthetic antioxidant at the market. The works done in this research explore the effects of different process parameter on antioxidant yield via ultrasonic extraction method. The extracted oil was recovered using rotary evaporator and the composition of vitamin C was determined using

Get Free Pitaya

HPLC. The parameter studied were different solid to solvent ratio (10 gram dried red Pitaya with 30 ml ethanol, 10 gram dried red Pitaya with 50 ml ethanol, 10 gram dried red Pitaya 200 ml ethanol, 10 red Pitaya with 250 ml ethanol), different ultrasonic power (150 watt, 200 watt, 250 watt, 300 watt), and different sonification time (20 minute, 30 minute, 50 minute, 60 minute). For the control sample, sample has been put into solvent without ultrasonic extraction. The analysis show that there is no antioxidant has been detected during the experiment. Results demonstrate that the highest value of vitamin C in first parameter is 6.16380 mg/L at 10 gram of dried red Pitaya with 250 ml ethanol. Besides, the

Get Free Pitaya

vitamin C recovery was 6.88542 mg/L obtained by using second parameter with 10 gram of dried red Pitaya and 250 ml ethanol. The best yield of vitamin C obtained was 7.13589 mg/L by using both of the best parameter which were (state what is the parameter) with different sonification time for about 50 minutes of ultrasonic extraction at 10 gram sample with 50 solvent and 300 watt.

The processing of tropical fruit juice has improved nowadays. Pitaya is one of the tropical fruits that have attracted the attention of consumers, fruit growers and also entrepreneurs in Malaysia. Since pitaya processing has just developed, more research should be conducted to increase the

Get Free Pitaya

production quality of pitaya product such as fruit juice. In this research, pitaya juice production operations were studied from the peeling process to the production of clear pitaya juice using enzyme. Further research was done to develop a process flow sheet for the production of pitaya juice at laboratory-scale. Laboratory-scale processing was carried out to resemble the large-scale processing in the industry. Calculation of material balance was done based on the process flow sheet developed. Data obtained from this research can be used as a base for developing a large-scale pitaya juice production process at industrial level.
