When the physics of MR imaging is discussed in the classical sense, the fundamental concept is that of “spin” or of “a spin.” Spin refers to a magnetic moment that results from or is associated

external magnetic field, such as that produced inside an imaging magnet, a small excess fraction of polarized nuclei, on average, align themselves with the magnetic field, producing a macroscopic, measurable magnetic moment ( figure 1) [ 9-11 ]. In addition, the interaction between the magnetic moment of the nucleus and
