The purpose of writing this book is sharing the vast experiences which the author has gathered during his undergraduate, post graduate and private practice.

Adverse Drug Interactions: A Handbook for Prescribers assists clinicians by providing key information on potential adverse effects that can result from prescribing two or more drugs for simultaneous use. Interactions that are likely to give rise to life-threatening conditions, and which must therefore be completely avoided, are clearly highlighted.

Safe and effective prescribing is one of the pillars of medical practice but is much more complicated than it seems. Many new prescribers find prescribing extremely challenging, and a plethora of independent, multidisciplinary prescribers are also seeking guidance. However, pharmacology textbooks are rarely practical. They warn to 'take care when prescribing erythromycin to a patient on warfarin, as the INR may rise'. But what should the prescriber actually do? *Surviving Prescribing* fulfils an important need by offering practical advice for real-world prescribing problems. The book complements existing educational resources but adds a new perspective. Written by experienced contributors from a variety of professional backgrounds, the content speaks directly to the problems routinely seen in hospital prescribing. And all in one, pocket-sized volume. Whether revising for the national Prescribing Safety Assessment, preparing for starting on the wards, or looking for a quick reference guide, this book is an essential companion.

A consolidation of the various experiences of the physicians who dedicated themselves for the cause of Homeopathic science.

From The Pen Of The Oldest Living Practitioner And Teacher.

Inseparable ward companion of students and doctors for quick and easy reference. This book is a primer of medical diagnosis for use by undergraduate medical students to facilitate their smooth entry into the medical wards through to their final year, internship and housemanship. It is equally useful for general medical practitioners to solve their day-to-day clinical problems.
