Learn Which Car Speakers Fit Your Car: Size Guide | World ...

The first thing to consider when looking for the optimal spots for your speakers is the room; it is the most influential factor when it comes to sound quality after the speakers themselves. Put most speakers close to walls and you end up with a boomy, shut-in sound, put them near the corners and this gets even more pronounced.

A step-by-step guide to the basics of speaker placement

What matters is the RMS power rating. Any typical aftermarket speaker will be a big improvement in the sound. Look for speakers with a minimum RMS power rating around 7-10 watts, and the max RMS power around 70 or 100 watts. Use our vehicle selector to find out which speakers fit your car and get some info on what else is needed for the installation. And if you have any further questions, call us at the number at the top of the page for the best help.

When shopping for a speaker that's more likely to come into contact with water or high levels of dust or sand, it's important to look for the IPX rating, which determines the level of waterproofing and protection The other rating to note is the Protection (IP number).

A guide to buying speakers - John Lewis & Partners

Optisound speakers are car specific, so fit seamlessly into door panels. They have bespoke details to ensure the best sound quality regardless of the shape and size of your car. Optisound speakers and their installation kits allow for a quick and easy fit, which is vastly different from a normal speaker fit.

Car Stereos Buyers Guide + Video | Halfords UK

Measure the height from the back of the speaker to the mounting frame. Set your speaker so the wide part of the cone is face-up again. Start your measurement from the bottom of the speaker up to the flat piece of plastic or metal around the cone, also known as the mounting frame. Write down the measurement you took so you don't forget it.
