Street children can suffer from mental health issues. Although many street children show incredible resilience in the face of unspeakable hardships, many studies show their sense of well-being to be generally low. Street-connected children often suffer from depression, anxiety and trauma, which then may lead to substance abuse and a risk of suicide.

[The Facts about Street Children | CSC](#)

Street children are poor or homeless children who live on the streets of a city, town, or village. Homeless youth are often called street kids or street child; the definition of street children is contested, but many practitioners and policymakers use UNICEF's concept of boys and girls, aged under 18 years, for whom "the street" has become home and/or their source of livelihood, and who are inadequately protected or supervised. Street girls are sometimes called gamines, a term that is also used

[Street children - Wikipedia](#)

Street children are minors who live and survive on the streets. They often grow up in public landfills, train stations, our under the bridges of the world's major cities. Because of conflicts with their family, these children don't want to or can't return home. Why does a child live on the streets? The phenomenon of street children is multifaceted.
