Rabbinic tradition asserts that every letter of every word of the Torah is a word in itself. Author Stan Tenen demonstrates that each letter is also a hand gesture, and it is at this level that Hebrew forms a natural universal language. All people, including children before they speak and people without sight, make natural use of these gestures. In *The Alphabet That Changed the World*, Tenen examines the Hebrew text of Genesis and its relationship to the alphabet. He shows how each letter is both concept and gesture, with the form of the gesture matching the function of the concept. There is thus an implicit relationship between the physical world of function and the conscious world of concept. Using over 200 color illustrations, Tenen demonstrates geometric metaphor as the best framework for understanding the deepest meaning of the text. Such geometry models embryonic growth and self-organization and the core of many healing and meditative practices. Many subjects in contemporary science were derived from the methods and means available to the ancients; *The Alphabet That Changed the World* makes this authoritative recovery of the "science of consciousness" in Genesis accessible for the first time to the contemporary reading public.

An accessible and thoughtful book that provides concrete steps for people to take as they seek to be genuinely transformed in their relationship with Jesus. The alphabet provides a simple road map that will draw you into the readings and encourage you to take practical steps toward personal transformation.

For fans of *P is for Pterodactyl* comes this groundbreaking spin on the ABCs from an acclaimed bestselling author and artist duo! Here's a totally twisted take on the alphabet that invites readers to look at it in a whole new way: An A is an H that just won't stand up right, a B is a D with its belt on too tight, and a Z is an L in a tug-of-war fight! Twenty-six letters, unique from each other -- and yet, every letter looks just like one another! Kind of like...one big family. From two bestselling masters of wordplay and visual high jinks comes a mind-bending riddle of delightful doppelgängers and surprising disguises that reveal we're more alike than we may think. You'll never look at the alphabet the same way again!

A New York Times Bestseller! A "raucous trip through the odd corners of our alphabet." —The New York Times Let's get real—the English language is bizarre. A might be for apple, but it's also for aisle and aeons. Why does the word "gnat" start with a G but the word "knot" doesn't start with an N? It doesn't always make sense, but don't let these rule-breaking silent letters defeat you! This whimsical, funky book from Raj Haldar (aka rapper Lushlife) turns the traditional idea of an alphabet book on its head, poking fun at the most mischievous words in the English language and demonstrating how to pronounce them. Fun and informative for word nerds of all ages!

Memoir

From a New York Times–bestselling historian comes the story of how the alphabet ordered our world. *A Place for Everything* is the first-ever history of alphabetization, from the Library of Alexandria to Wikipedia. The story of alphabetical order has been shaped by some of history's most compelling characters, such as industrious and enthusiastic early adopter Samuel Pepys and dedicated alphabet champion Denis Diderot. But though even George Washington was a proponent, many others stuck to older forms of classification -- Yale listed its students by their family's social status until 1886. And yet, while the order of the alphabet now rules -- libraries, phone books, reference books, even the order of entry for the teams at the Olympic Games -- it has remained curiously invisible. With abundant inquisitiveness and wry humor, historian Judith Flanders traces the triumph of alphabetical order and offers a compendium of Western knowledge, from A to Z.

Why stick with plain old A, B, C when you can have Amelia (Earhart), Malala, Tina (Turner), Ruth (Bader Ginsburg), all the way to eXtraordinary You—and the Zillion of adventures you will go on? Instagram superstar Eva Chen, author of *Juno Valentine* and *the Magical Shoes*, is back with an alphabet board book depicting feminist icons in *A Is for Awesome: 23 Iconic Women Who Changed the World*, featuring spirited illustrations by Derek Desierto.

A heart based book that inspires children to be kind, compassionate, and loving to people and the planet.

From Amelia Earhart to Oprah Winfrey, Vivienne Westwood to Frida Kahlo, *Lady Legends Alphabet* presents the quintessential A to Z of strong, talented, irrepressible women that every young girl, and boy, should know and admire. A must own handbook for the modern child aiming to realise their true potential in a rapidly changing world.
